DEPARTMENT OVERVIEW

The **Department of Radiology and Biomedical Imaging at the University of California, San Francisco**, is a leading health sciences center focused on serving patients, conducting research, and training the next generation of radiologists.

We are proud to have some of the foremost names in diagnostic, therapeutic, and interventional radiology developing promising new approaches to identify and treat disease. We are a patient-centered team, and are proud that the community recognizes us for our compassion and care.

We are committed to creating a culture of diversity, equity and inclusion within our department and the community we serve. We aim to build and develop a broad group of faculty, trainee and staff community with diverse backgrounds and a common desire to serve culturally diverse and underserved populations.

Mission & Vision

UCSF is a Global Leader in Radiology and Biomedical Imaging

Our missions are:

- **Provide excellent clinical imaging that improves diagnosis and treatment of patients**
- **Demonstrate national leadership in advancing imaging science**
- **Educate tomorrow's leaders in radiology and biomedical imaging science**

We invite you to browse through our [department website](#) to explore our past accomplishments, our current strengths and the future promise that the talented individuals and technologies in the UCSF Department of Radiology and Biomedical Imaging bring to our patients and to the field of Radiology.

REMUNERATION

Faculty Compensation Plan

Department of Radiology and Biomedical Imaging faculty are members of the University of California Health Sciences Compensation Plan. Here are the benefits:

- **2 vacation days per month** accumulated
- **20 meeting days per year** to attend meetings, presentation, CME, etc
