

# CT Lung Cancer Screening Saves Lives

## If you:

- ▶ **Currently smoke or quit smoking within the past 15 years**
- ▶ **Are 50-74 years old**

You may be at increased risk for lung cancer and may benefit from the UCSF Lung Cancer Screening Program.

## The UCSF Lung Cancer Screening Program:

- ▶ Includes a CT scan and a same-day visit with a pulmonologist (a doctor who is an expert in breathing problems and lung diseases)
- ▶ Uses the latest CT scan technology shown to detect lung cancer at relatively early stages and reduce lung cancer deaths by as much as 20 percent
- ▶ Gives the best chance for early detection and treatment
- ▶ Employs low-dose protocols to greatly reduce radiation exposure
- ▶ Is offered at a discounted self-pay price

Please call us at **(415) 514-8787** to schedule your screening or visit us online at **[www.ucsfhealth.org/lungscreening](http://www.ucsfhealth.org/lungscreening)**.
